

Geo-Plus Software installation procedures - Version 18.0

Recommendations: Before the installation, make a backup. Then close all applications and, in order to be certain that all programs have properly closed, restart the computer.

Necessary configuration

The installations on this CD-Rom are compatible with Windows2000©, Windows XP© or Windows Vista©. You must have the administrator rights to be able to install.

Design platform

The supported AutoCAD versions are: AutoCAD 2000, AutoCAD 2002, AutoCAD 2004, AutoCAD 2005, AutoCAD 2006, AutoCAD 2007 and AutoCAD 2008.

The supported MicroStation versions are: MicroStation SE, MicroStation J, MicroStation V8 and MicroStation XM.

Before proceeding

In order to ensure a better service, we strongly advise you to install the software in the installation folder of the previous version. The application data will not be lost. You must uninstall the previous version before installing the new version.

Protection of the Software

The software of this version is protected with FlexLM.

Handbooks

You can get the user guides for the software's on your CD-Rom in the User guide directory.

Geoplus.ini

All of our products now use the geoplus.ini parameter file, which is in your installation folder.

Odbc connections

If your operating system is Windows2000©, Windows XP© or Windows Vista© you must install the products with admin privileges. If you open a Windows session with a user name different from administrator, you will lose the ODBC connection for your user. You can recreate ODBC connections of VisionPlus and VisionCogo by double-clicking on the files located in the installation folder of VisionPlus in the Util sub-directory. This operation registers ODBC connections in the Windows© registers for the current user.

Order of the installations

You must install VisionPlus before installing VisionDTM or VisionMust because they do not contain VisionPlus but have components, which are added to VisionPlus.

Installation procedure

- Insert the GeoPlus CD-Rom in your CD-Rom reader
- If no menu pops on your screen, execute the menu.exe file
- In the menu, select installations
- Then choose the software you want to install
- During the installation, you must choose the same folders **in which they were previously installed** VisionPlus (ex: C:\Program files\VisionPlus) and AutoCAD (ex: C:\Program files\Acad2008).
- When the installation is finished, you must restart the computer if the installation program requires it otherwise the installation remains incomplete. If you agree to start again, wait until the installation program restarts.

Expect a delay of 1 or 2 minutes after you restart the computer before everything falls in order.

Thank you for choosing VisionPlus Software.
